

C150 Filter

Our only hot water filter option, the Brita C150 is a medium sized resin scale removal filter. Ideal for those with a hot water boiler, or hot water dispensing machine. The lifespan of this filter varies dependant on the hardness of the water in your area and the temperature of the water used.

- Designed for hot water machines in hard water areas
- Aids in removing minerals that can build up to create scale
- Helps preserve your machines natural working functions for longer
- It is recommended that this filter is purchased with an installtion rail
