

## The Smart Boiler

- Saves you money and reduces your carbon footprint

## Description

The PowerSmart3 is incredibly smart. The eco sensor turns the boiler off (sleep mode) automatically when the lights go out. This can save you approx £265 pa in electricity and 175kg in carbon production. The unnecessary boiling during the night reduces the build up of scale and extends the boilers life between de-scaling times.

## Specification

- Weight: 9.8kg
- Low Height to fit comfortably under overhanging kitchen cupboards
- Power supply consumption: 220, 50/60Hz  
- 1.85 KWH consumption in stand-by mode
- Mains connection: 1.5m food quality hose with 3/4 inch BSP connection
- Capacity: 17 litres/90c + hourly output, 5.7 litres/90c + instant draw off

## Dimensions (mm)

W215 X D345 X H436
