Elegant Under-Counter Tap

- Instant Boiling Plus Ambient Or Chilled Water

With Unique Scale Protection

Description

Stylish chrome tap with electronic touch panel faucet with hot water safety button. The **EZYTAP75/EZYTAP7800** boiler and chiller are discreetly housed in the cabinet base unit underneath the tap.

Specification

Tap

- Chrome faucet with electronic controls
- Touch control dispensing taps
- Flashing indicator light when heating
- Hot water safety tap
- Dispensing height of 200mm

Drip Trays

- EZYTRAY1: Stand-alone drip tray

Scale protection

- The two separate mains water inlets allow for the installation of a scale removal filter on the boiler inlet and a much more cost-effective taste, odour and turbidity carbon block filter on the ambient/chilled side
- Scale removal filters are expensive and since their effective 'life' is measured in litres of water passing through it, it is important to use it only on the boiler side
- Soft water areas only require a single carbon filter connected to a combined boiler and ambient/chilled inlet
- The EZYTAP boiler can be opened for descaling and servicing.

Venting

- An expansion chamber absorbs the steam/water pressure created during boiling and reduces the risk of drips of water or steam from the tap. It is nevertheless recommended to mount the EZYTAP over a sink or drip tray.

Model	Hourly output			Dimensions (mm)	Temp
	Hot	Ambient	Chilled		
EZYTAP75	14ltr	indefinite	n/a	329h, 220w, 352d	95C max
EZYTAP7800	14ltr	n/a	8ltr	Boiler 329h, 220w, 352d	95C max
				Chiller 265h, 200w, 380d	6 - 10C
