

## Drinking Water Fountain

- With durable push button operated Bubbler  
& Glass Filler Faucets

### Description

Connected to the mains water supply. Installing a Carbon Block Filter removes the Chlorine taste and smell of mains water. The Water Fountain needs to be connected to a waste trap, via a flexible waste pipe. The WFT6 is not intended for outdoor use. Water Fountains should only be installed by a competent & trained technician. The connection to the water mains must comply with Water Regulations and the connection to the electricity supply must meet electrical requirements
