

Under Sink Chiller

- with contactless swan neck tap to avoid hand to tap contamination

Description

The UC800MCL Undersink Chiller is designed to be installed in a kitchen cabinet under the counter. The chilling unit's impressively quiet operation will not disturb anyone nearby. The unit comes complete with contactless dispensing elegant Chrome Swan Neck Tap, which is installed above the counter, will be the only visible element. The undersink chiller should be installed next to a draining sink and provides an impressive 11.5 ltr/h of chilled water below 10°C

Specification

- Cold Water Tank: Stainless Steel, 1.95 Litres
- Cooling Performance: 11.5 Litres per hour below 10°C at influent water temperature of 20°C
- Thermostat: 4°C to 10°C Factory set (Do not adjust)
- Refrigeration System: R-600a, 16g
- Power Supply: 220-240Volt, 50/60 Hz
- Inlet and Outlet Pipes: 1/4" Push Fit
- Ventilation: allow for 50 mm clearance on all sides
- For best performance please ensure installation has adequate ventilation. Poor ventilation will adversely affect the performance of this product and may result in premature failure
- The Infra-Red Sensor of the contactless Swan Neck Tap is activated by a hand hovering over the Infra-Red Sensor at a distance of 2cm to 5cm
- The Sensor is connected to an Inlet Solenoid valve which opens the water supply when activated, and stops the water flowing when the hand is removed
- The Solenoid Valve is powered by two 3V batteries with a tested life span of 86.000 Solenoid activations
- The Contactless tap is programmed to stop dispensing after 6 seconds. If that is insufficient to fill your glass or bottle, place your hand again over the sensor to continue dispensing
